

Transform Your Body

Tone, Smooth, and Slim with
Celluma Contour and Balancer Pro

Have a wedding coming up or any special event? If you are looking to tone specific areas, smooth your skin, or lose inches around your waist, hips, or thighs, the combination of Celluma Contour and Balancer Pro could be your solution.

What are they?

Celluma Contour: This emits specific wavelengths of light that penetrate deep into your cells to help reduce inches on waist, hips, and thighs. This results in smaller fat cells!

Balancer Pro: A lymphatic drainage compression treatment that improves circulation, reduces swelling, and flushes out toxins from your body. It helps to reduce water retention and swelling leading to a more toned and slimmer look!

Combine the two with consistency, healthy diet, and exercise and it will lead to a slimmer you!

Lightstim on your face while using Balancer Pro is a bonus! What is Lightstim you ask? It uses specific wavelengths of light energy to treat active-aging, acne, or pain. Diminish those fine lines and wrinkles and your skin will glow!
